Product Description

Anodized 3D Printed Titanium Framework Lightweight and Suitable For Sensitive Skin

Our F

Product Description:

One of the key benefits of the Titanium Framework is that it can be anodized into different colors. This product is designed to provide excellent support and stability to your teeth, ensuring that they stay in place and do not shift or loosen over time. This makes it a great choice for those with active lifestyles or those who are prone to teeth grinding or clenching.

Another major benefit of this product is that it is hypoallergenic, making it suitable for those with sensitive skin or allergies. This means that you can wear it comfortably and without any irritation or discomfort. Additionally, the product is rust-resistant, which means that it will not corrode or degrade over time, even with frequent exposure to moisture.

The Titanium Framework is also suitable for those who require medical examinations. Unlike other dental appliances, this product does not affect medical examinations, making it an excellent choice for those who need to undergo regular medical checkups or procedures.

Finally, the Titanium Framework has a small specific gravity, which means that it is lightweight and easy to wear. This makes it a great choice for those who want a dental appliance that is comfortable and easy to use, without sacrificing durability or strength.

In conclusion, if you are looking for a dental appliance that is strong, hypoallergenic, rust-resistant, suitable for sensitive skin, durable, and does not affect medical examinations, the Titanium Framework is the perfect choice for you.

Applications:

The ADL Titanium Framework is a high-quality dental product that is designed to meet the needs of patients who require a durable and long-lasting dental appliance. This product is made from high-quality titanium, which has a small specific gravity and is non-magnetic, making it an ideal choice for dental applications. The ADL Titanium Framework is also hypoallergenic, which means that it is unlikely to cause any allergic reactions in patients.

The ADL Titanium Framework is made in Shenzhen, China and has been certified by ISO/CE/FDA, ensuring that it meets all the necessary quality and safety standards. The minimum order quantity for this product is negotiable, and the price is also negotiable, depending on the order size. The product is packaged in plastic bags and boxes, ensuring that it is protected during transportation and storage.

The ADL Titanium Framework is designed for use in a wide range of dental applications, including dentures, bridges, and other dental appliances. The product is corrosion-resistant, which means that it will not rust or corrode over time, ensuring that it remains durable and long-lasting. The clear clasps and tooth-colored clasps are customizable and adjustable, allowing the product to be tailored to the specific needs of each patient.

The ADL Titanium Framework is an ideal choice for patients who require a high-quality dental appliance that is both durable and long-lasting. The product is easy to use and can be adjusted to fit the specific needs of each patient. The delivery time for this product is 72 hours, and payment can be made via Paypal or T/T. The product is also supplied by 630 technicians, ensuring that it is readily available to meet the needs of dental professionals around the world.
