Product Description

Hard Occlusal Splint for Jaw Pain Relief Protection Level Comfortable Wear

Our F

Product Description:

The Occlusal Splint (Hard) is made of a clear material, ensuring that it does not interfere with the wearer's appearance or speech. This feature makes it a popular choice among individuals who prefer subtlety in their oral appliances. The product's clear color also makes it easy to spot any signs of wear and tear, indicating the need for a replacement.

Aside from its aesthetic benefits, the Occlusal Splint (Hard) is also designed with hygiene in mind. The product is easy to clean, ensuring that the wearer can maintain proper oral hygiene while using it. This feature is especially important since oral appliances can be breeding grounds for bacteria and other harmful microorganisms.

When it comes to comfort, the Occlusal Splint (Hard) does not disappoint. The product is designed to be comfortable to wear, providing a snug fit that does not impede the wearer's breathing or cause discomfort. This feature is essential since discomfort can cause wearers to remove the mouthguard, thereby defeating its purpose.

The Occlusal Splint (Hard) is shaped like a mouthguard, making it easy to fit into the wearer's mouth. Its shape ensures that it provides adequate coverage for the teeth and gums, preventing damage caused by grinding and clenching. The product's design also ensures that it does not interfere with the wearer's sleep, allowing for uninterrupted rest.

In summary, the Occlusal Splint (Hard) is a must-have for individuals dealing with nighttime teeth grinding and clenching. Its hard and soft material options, clear color, easy-to-clean hygiene feature, comfortable fit, and mouthguard shape make it an excellent investment for oral health and overall well-being.

Applications:

The ADL Occlusal Splint is a high-quality product that offers excellent protection for the teeth. It is available in both soft and hard versions, giving customers the option to choose the one that best suits their needs. The hard occlusal splint is designed to provide maximum protection for the teeth, while the soft/hard splints offer a more comfortable fit. Both versions of the splint are adjustable for fit, making them suitable for people of all ages.

The ADL Occlusal Splint is perfect for people who suffer from teeth grinding, as it helps to prevent damage to the teeth and jaw. This product is also ideal for people who have recently undergone dental work, as it helps to protect the teeth and keep them in place. It is easy to clean and maintain, ensuring that it remains hygienic and safe to use.

Customers can rest assured that they are purchasing a high-quality product when they choose the ADL Occlusal Splint. This product is designed to offer excellent protection for the teeth and jaw, and is adjustable for fit. It is available in both soft and hard versions, giving customers the option to choose the one that best suits their needs. With a supply ability of 630 technicians, customers can be assured that their orders will be filled in a timely and efficient manner. The ADL Occlusal Splint is a must-have for anyone who is serious about protecting their teeth and ensuring their oral health.

Order your ADL Occlusal Splint today and start enjoying the benefits of a high-quality dental appliance!
