Product Description

Product Description:

Our F

Our screw expander is an essential tool in orthodontic treatment, providing a non-invasive way to widen the upper jaw and correct crossbites. With its easy-to-use design, our 3D screw expander is suitable for patients of all ages and can be adjusted to fit your specific needs.

Our product is specially designed to ensure patient comfort, making it easier for them to adjust to their new orthodontic appliance. The screw expander works by applying gentle pressure to the teeth, gradually widening the jaw and creating more space for crowded teeth. The screw expander is a versatile appliance that can be used for a range of orthodontic treatments, including molar distalization and midline correction. Its removable design means that patients can easily take it off for cleaning and eating, making it a practical solution for those with busy lifestyles.

At our company, we are committed to providing high-quality orthodontic appliances that are both effective and affordable. Our 3-dimensional screw expander is no exception, offering a cost-effective solution for those seeking orthodontic treatment. Overall, our orthodontic 3D Screw Expansion appliance is an essential tool for anyone looking to correct crossbites, expand the jaw, or improve their overall dental health. With its comfortable and easy-to-use design, our 3D screw expander is the perfect choice for patients of all ages. So why wait? Order your 3-dimensional screw expander today and start your journey towards a healthier, happier smile!

Applications:

The ADL Screw Expander is a removable type of expander, and it is designed to help patients achieve the desired dental arch form and occlusion. It is an essential tool for orthodontists as it helps to correct malocclusions, crossbites, and narrow dental arches. The product is easy to use and can be adjusted to suit individual patients' needs.

The ADL Screw Expander is suitable for both adults and children, and it can be used in various occasions and scenarios. The 3-dimensional screw expander is ideal for patients who require expansion in both the transverse and distal directions. The product is also beneficial for patients who have a narrow upper jaw and require expansion in the maxilla.

The ADL Screw Expander is an excellent product for orthodontic treatment, and it is a popular choice among dentists and orthodontists. The product is available in plastic bags and boxes, and the delivery time is 72 hours. The minimum order quantity is negotiable, and the price is also negotiable. The payment terms are Paypal or T/T, and the supply ability is 630 technicians.

Overall, the ADL Screw Expander is an innovative product that is designed to meet the needs of orthodontic patients. It is an efficient tool for achieving the desired dental arch form and occlusion. The 3-dimensional screw expander is also available in variants such as 3-dimensional expander orthodontic, 3-dimensional screw expander, and 3D screw expander Dentaurum.
