Product Description

Customizable Orthodontic Fan Expander Provides Posterior Cross Bite Free Section Expansion

Product Description:

The Fan Expander is a type of rapid maxillary disjunction appliance that is commonly used in orthodontics to treat crowding, crossbites, and other dental issues. This appliance is designed to widen the upper arch of the mouth, creating more space for crowded teeth and improving the overall alignment of your bite.

One of the key benefits of the Fan Expander is its customizability. This appliance can be tailored to meet the unique needs of each patient, ensuring that it fits comfortably and securely in the mouth. The expansion screws can be adjusted to gradually widen the arch, and the bands and lingual wire can be modified to fit the shape of your teeth.

The Fan Expander is an ideal choice for patients who want to achieve a wider, more symmetrical smile without undergoing extensive orthodontic treatment. Unlike traditional expanders, this appliance is designed to focus on the anterior section of the mouth, which means that it can produce results more quickly and efficiently.

Features:

Product Name: Fan Expander

Type: Orthodontic treatment

Customizability: Yes

Durability: Long-lasting

Purpose: Widen The Anterior Section Without Creating Posterior Cross Bite

Material: Expansion Screw, Bands, Lingual Wire And Acrylic

Technical Parameters:

Durability	Long-lasting
Type	Rapid Maxillary Disjunction
Material	Expansion Screw, Bands, Lingual Wire And Acrylic
Category	Orthodontic Treatment Of Expansion
Customizability	Yes
Purpose	Widens The Anterior Section Without Creating Posterior Cross Bite

Applications:

The Fan Type Expander orthodontic is customizable and can be tailored to fit the unique needs of each patient. This product is ideal for individuals who require rapid maxillary disjunction (RMD) treatment. The Fan Type Expander orthodontic is designed to provide long-lasting results, making it a preferred choice for orthodontists and patients alike.

The Fan Type Expander orthodontic is suitable for use in various scenarios such as dental clinics, hospitals, and private practices. It comes in plastic bags and box packaging and has a minimum order quantity that is negotiable. The price of this product is also negotiable, and payment can be made via Paypal or T/T.

ADL's Fan Type Expander orthodontic is supplied by over 630 technicians, ensuring that it is readily available to orthodontic practitioners. The delivery time of this product is 72 hours, making it a convenient option for those who need it urgently.

In summary, the Fan Type Expander orthodontic is a category-leading product that has been designed to provide a long-lasting solution to orthodontic patients. Its durability, customizability, and rapid maxillary disjunction (RMD) treatment capabilities make it ideal for use in various orthodontic treatment scenarios.
