## Product Description

### Stainless Steel Orthodontic Nance Appliance Comfortable Horseshoe Design For Orthodontic Clinics

#### Product Description:

Orthodontic appliances such as the Nance Appliance are essential for correcting dental issues related to the alignment and position of teeth. Orthodontists use these appliances to help move teeth into their proper position, improve oral health, and create a beautiful smile. The Nance Appliance is a fixed orthodontic appliance, which means it is permanently attached to the teeth. This allows for consistent treatment and ensures that the appliance will not be lost or misplaced. Because it is made of stainless steel, the Nance Appliance is durable and can withstand the daily wear and tear of normal use.

The non-adjustable feature of the Nance Appliance means that it cannot be manipulated or changed once it has been placed. This allows for a more predictable treatment outcome and reduces the need for additional adjustments or appointments.

If you are considering orthodontic treatment, the Nance Appliance may be a viable option. Talk to your orthodontist to see if this appliance is right for you.

#### Features:

**Product Name:** Nance Appliance

**Availability:** Widely Available In Orthodontic Clinics

**Hygiene:** Easy To Clean

**Function:** Retain The Upper Molars In Their Current Position While Allowing The Lower Teeth To Move Forward

**Durability:** Durable
