Product Description

Functional Frankel in Vibrant Colors for Children and Adults Supporting Occlusion Recovery

Our F

Product Description:

The Frankel II appliance is a popular choice among orthodontic patients due to its effectiveness in treating a variety of functional malocclusions, including overbite, underbite, and crossbite. This device works by repositioning the jaw and encouraging proper alignment of the teeth, resulting in a more aesthetically pleasing and functional smile.

In addition to its functional benefits, the Frankel II appliance is available in a variety of colors, making it a fun and personalized option for patients of all ages. Whether you prefer bold and bright hues or more subtle shades, there is a Frankel II device to suit your style. Overall, the Frankel II Orthodontic Device is a reliable and effective solution for those seeking to correct their malocclusion. Its 2nd generation design ensures optimal results, and its variety of color options makes it a fun and personalized choice. If you are looking to improve your smile and correct your bite, the Frankel II appliance may be the perfect solution for you.
