### Basic Information

- Place of Origin: Shenzhen, China
- Brand Name: ADL
- Certification: ISO/CE/FDA
- Minimum Order Quantity: Negotiable
- Price: Negotiable
- Packaging Details: Plastic bags and box
- Delivery Time: 72 Hours
- Payment Terms: Paypal or T/T
- Supply Ability: 630 Technicians

### Product Specification

- Convenient: Yes
- Adjustability: Adjustable For Fit
- Breathability: Breathable
- Flexibility: High
- Usage: For Nighttime Teeth Grinding
- Durability: Durable
- Design: Bite Splint Design
- Comfortable: Yes
- Highlight: flexible nylon occlusal splint, dental guard for sleep protection, occlusal stabilization dental splint

### Product Description

**Product Description:**

Our Product

The Occlusal Splint / Sport Guard is a high-quality dental appliance designed to provide effective protection and comfort for individuals who require support for their teeth and jaw. Crafted using advanced technology, this product is a 3D Printed Nylon splint that ensures a precise fit tailored to the user's unique dental structure. The use of nylon material not only guarantees durability but also offers exceptional flexibility, making it an ideal choice for both night-time use and active sports protection. One of the standout features of this Occlusal Splint / Sport Guard is its breathability. Unlike traditional guards that can feel bulky and restrict airflow, this 3D Printed Nylon splint is designed with a breathable structure that allows for continuous air circulation. This breathability enhances comfort, especially during extended wear, by reducing moisture buildup and preventing irritation in the mouth. Users can confidently wear the splint throughout the night or during physical activities without experiencing discomfort commonly associated with less breathable guards. Effectiveness is a key attribute of this Nylon night guard. It provides reliable protection against teeth grinding, clenching, and potential damage caused by sports-related impacts. The splint's high flexibility ensures it adapts perfectly to the contours of the teeth and jaw, offering optimal cushioning and support. This adaptability not only improves the protective function but also helps in alleviating symptoms related to temporomandibular joint disorders (TMJ), making it a versatile solution for various dental needs. Maintaining hygiene is hassle-free with the Occlusal Splint / Sport Guard. Its smooth nylon surface is easy to clean, allowing users to keep the splint fresh and free from bacteria with minimal effort. Regular cleaning helps extend the lifespan of the splint while ensuring oral health is not compromised. The convenience of easy maintenance adds to the overall user experience, making this guard a practical addition to daily dental care routines. Convenience is further enhanced by the product's lightweight design and user-friendly nature. The 3D Printed Nylon splint can be easily inserted and removed, providing a secure yet comfortable fit without the need for complicated adjustments. Whether it's used as a night guard to prevent bruxism or as a sport guard to protect against dental injuries, this product offers a seamless balance between protection and comfort. In summary, the Occlusal Splint / Sport Guard is an excellent choice for anyone seeking an effective, breathable, and easy-to-maintain dental guard. Its innovative 3D Printed Nylon splint construction delivers superior flexibility and durability, while the breathable design ensures all-day comfort. The Nylon night guard is not only highly functional but also convenient to use, making it a reliable solution for protecting your teeth and improving oral health. Whether for nighttime grinding prevention or active sports protection, this splint stands out as a premium product that meets the demands of modern dental care.

## Features:

Product Name: Occlusal Splint / Sport Guard  
Material: 3D Printed Nylon night guard for superior comfort and fit  
Design: Bite Splint Design to effectively prevent teeth grinding  
Durability: Durable construction ensures long-lasting use  
Breathability: Breathable design for comfortable nighttime wear  
Easy To Clean: Yes, easy to maintain hygiene  
Usage: Specifically designed for nighttime teeth grinding protection  
Advanced Technology: Made with 3D Printed Nylon splint technology for precision and reliability

## Technical Parameters:

Easy To Clean	Yes
Usage	For Nighttime Teeth Grinding
Durability	Durable
Design	Bite Splint Design
Flexibility	High
Adjustability	Adjustable For Fit
Convenient	Yes
Effective	Yes
Comfortable	Yes
Breathability	Breathable

This 3D Printed Nylon splint serves as a highly effective Nylon night guard designed specifically for nighttime teeth grinding. The Nylon night guard features a durable yet flexible bite splint design, ensuring comfort and adjustability for a perfect fit. Its breathable structure makes it convenient and easy to clean, providing a comfortable protective solution for your dental health.

## Applications:

The ADL Occlusal Splint / Sport Guard is an advanced dental protection product designed to provide maximum comfort and durability for various application occasions and scenarios. Originating from Shenzhen, China, this product is crafted with high-quality materials and backed by ISO, CE, and FDA certifications, ensuring safety and reliability for users worldwide.

One of the primary applications of the ADL Nylon occlusal splint is in the prevention and treatment of bruxism, a condition characterized by teeth grinding during sleep. The 3D Printed Nylon night guard offers a precise and customized fit, thanks to its innovative bite splint design, which ensures high flexibility and effective protection against enamel wear and jaw pain. Its durable construction makes it a long-lasting solution that withstands nightly use without deformation or loss of effectiveness.

For athletes and sports enthusiasts, the ADL sport guard provides excellent protection during high-impact activities. The Nylon night guard's high flexibility allows for comfortable wear without restricting breathing or speech, making it suitable for contact sports such as football, hockey, and martial arts. Its easy-to-clean feature ensures hygiene is maintained even after rigorous use, while the robust design safeguards against dental injuries.

In dental clinics and professional settings, the ADL Nylon occlusal splint is widely used by technicians skilled in providing customized dental appliances. With a supply ability of 630 technicians, ADL can fulfill orders promptly, with a typical delivery time of just 72 hours. Packaging details include secure plastic bags and boxes to protect the product during shipping. The minimum order quantity is negotiable, and pricing can be tailored based on order size and specifications, with payment terms supporting both Paypal and T/T transactions.

Overall, the ADL 3D Printed Nylon night guard and occlusal splint stand out due to their combination of durability, effective protection, and user-friendly design. Whether for nighttime teeth grinding prevention, sports safety, or professional dental applications, this product reliably meets diverse needs with its advanced materials and superior craftsmanship.
