### Basic Information

- Place of Origin: Shenzhen, China
- Brand Name: ADL
- Certification: ISO/CE/FDA
- Minimum Order Quantity: Negotiable
- Price: Negotiable
- Packaging Details: Plastic bags and box
- Delivery Time: 72 Hours
- Payment Terms: Paypal or T/T
- Supply Ability: 630 Technicians

### Product Specification

- Durability: Durable
- Easy To Clean: Yes
- Comfortable: Yes
- Adjustability: Adjustable For Fit
- Convenient: Yes
- Flexibility: High
- Design: Bite Splint Design
- Breathability: Breathable
- Highlight: occlusal splint for teeth grinding,  
sport guard bite splint,  
comfortable teeth grinding protector

### Product Description

**Product Description:**

Our Product

The Occlusal Splint / Sport Guard is an advanced dental appliance designed to provide superior protection and comfort for individuals who require effective oral care during sleep or physical activities. Crafted with precision using cutting-edge technology, this product is a 3D Printed Nylon night guard that stands out for its exceptional quality, durability, and user-friendly features. Whether you need a reliable night guard to prevent teeth grinding or a sport guard to shield your teeth during high-impact activities, this product offers an ideal solution that combines convenience, effectiveness, and comfort.

One of the most notable features of this Occlusal Splint / Sport Guard is its material composition. Made from high-quality nylon through 3D printing technology, this 3D Printed Nylon night guard ensures an outstanding combination of strength and flexibility. The nylon material is inherently durable, providing long-lasting protection against wear and tear, which is essential for appliances designed to endure constant pressure and impact. This durability makes the guard a cost-effective investment, as it maintains its integrity and performance over an extended period without frequent replacements.

Adjustability is a critical aspect when it comes to oral appliances, and the Occlusal Splint / Sport Guard excels in this regard. The product is designed to be adjustable for fit, allowing users to customize the guard to their unique dental structure. This adjustability ensures a secure and comfortable fit, reducing any irritation or discomfort that might arise from using a poorly fitting guard. By offering a tailored fit, the 3D Printed Nylon night guard enhances user compliance, making it easier for individuals to wear it consistently and benefit from its protective properties.

Another significant advantage of this product is its breathability. The design incorporates breathable features that facilitate airflow, making it more comfortable to wear for extended periods, especially during sleep or intense physical activity. Breathability prevents the buildup of moisture and heat, which can cause discomfort or even oral health issues such as bacterial growth. With this breathable 3D Printed Nylon night guard, users experience improved comfort and hygiene, encouraging regular use and better oral protection.

Effectiveness is paramount in any dental guard, and this Occlusal Splint / Sport Guard delivers exceptional performance. It effectively mitigates the effects of bruxism (teeth grinding) by providing a protective barrier that absorbs and distributes the pressure exerted during grinding or clenching. For athletes, it offers robust protection against impacts that could otherwise cause dental injuries. The precision of the 3D printing process ensures that the guard fits snugly and performs optimally, maximizing its protective capabilities.

Convenience is also a key benefit of this product. The ease of adjusting the fit, combined with its durable and breathable design, makes the Occlusal Splint / Sport Guard an appliance that fits seamlessly into daily routines. Users can quickly adapt the guard to their needs without requiring professional assistance, and its lightweight construction means it won't interfere with normal breathing or speech. This convenience encourages consistent use, which is crucial for achieving the best results in preventing dental damage or discomfort.

In summary, the Occlusal Splint / Sport Guard is an innovative and reliable dental appliance that leverages the advantages of a 3D Printed Nylon night guard. Its durable nylon construction, adjustable fit, breathable design, and proven effectiveness make it an excellent choice for anyone seeking superior oral protection. Whether for nighttime bruxism or sports-related dental safety, this guard offers convenience, comfort, and peace of mind, ensuring that your teeth remain protected under various conditions.

## Features:

Durable Nylon occlusal splint for long-lasting use  
Breathable design ensures comfort during wear  
Bite Splint Design for effective occlusal protection  
High flexibility for ease of movement and comfort  
Adjustable for fit to provide personalized comfort  
3D Printed Nylon night guard offers precise and custom fit  
Lightweight and strong Nylon occlusal splint material

## Technical Parameters:

Easy To Clean	Yes
Convenient	Yes
Flexibility	High
Effective	Yes
Breathability	Breathable
Comfortable	Yes
Durability	Durable
Design	Bite Splint Design
Adjustability	Adjustable For Fit
Usage	For Nighttime Teeth Grinding

## Applications:

The ADL Occlusal Splint / Sport Guard is expertly crafted in Shenzhen, China, combining advanced technology with high-quality materials to deliver superior protection and comfort. Featuring a 3D Printed Nylon splint design, this product offers exceptional durability and flexibility, making it an ideal choice for various application occasions and scenarios.

One of the primary applications of the ADL Nylon occlusal splint is in dental care, where it functions as a bite splint designed to alleviate teeth grinding and jaw clenching. Patients suffering from bruxism or temporomandibular joint disorders can benefit greatly from the breathable and easy-to-clean properties of this splint. The 3D Printed Nylon splint ensures a precise fit, enhancing comfort during prolonged use and promoting better oral health.

In sports and athletic activities, the ADL Sport Guard plays a crucial role in protecting athletes from dental injuries. Its high flexibility and durable construction absorb impact effectively, safeguarding teeth and gums during contact sports such as football, basketball, and martial arts. The breathable material allows for comfortable wear even during intense physical exertion, while the bite splint design ensures that the guard stays securely in place.

Moreover, the ADL Nylon occlusal splint is suitable for use in night-time applications, providing protection and support to individuals who experience nocturnal teeth grinding. Its easy-to-clean surface makes maintenance hassle-free, supporting hygiene and longevity of use. The product's design is certified by ISO, CE, and FDA, ensuring it meets international standards for safety and quality.

With a flexible supply ability of 630 technicians and a negotiable minimum order quantity and price, ADL offers customized solutions tailored to individual needs. The product is conveniently packaged in plastic bags and boxes, with a swift delivery time of 72 hours.

Payment can be made securely via Paypal or T/T, making the purchasing process smooth and efficient.

In summary, the ADL 3D Printed Nylon splint is a versatile and reliable solution for dental protection and sports safety. Its breathable, durable, and easy-to-clean design, combined with advanced 3D printing technology, ensures optimal performance in a wide range of occasions and scenarios, from clinical dental applications to active sports environments.

## FAQ:

**Q1: What is the brand name of the Occlusal Splint / Sport Guard?**

**A1:** The Occlusal Splint / Sport Guard is branded as ADL.

**Q2: Where is the Occlusal Splint / Sport Guard manufactured?**

A2: It is manufactured in Shenzhen, China.
