Product Description

3D Printed Hard Occlusal Splint Night Guard Lightweight Comfortable Mouthguard

Our F

Chinese Dental Lab

Product Description:

The Hard Occlusal Splint is a highly effective dental appliance designed specifically for individuals who suffer from nighttime teeth grinding, also known as bruxism. Crafted with precision and care, this product offers a comfortable and convenient solution to protect your teeth from the damaging effects of grinding and clenching during sleep. Its innovative Bite Splint Design ensures optimal fit and function, making it an essential tool for maintaining oral health and preventing long-term dental issues.

Comfort is a paramount consideration in the design of the occlusal splint. Unlike bulky or rigid guards that can cause discomfort or interfere with breathing, this product offers a lightweight and ergonomic fit that adapts to the natural contours of your teeth and jaw. This comfortable fit encourages regular use, which is critical for those looking to mitigate the harmful effects of bruxism. Users can expect a barely noticeable presence in the mouth, allowing for uninterrupted sleep and peace of mind.

Convenience is another key attribute of this occlusal splint. Its easy-to-use design means that it can be quickly inserted and removed without hassle, making it ideal for daily use. The night guard requires minimal maintenance, as it is simple to clean and resistant to odors and bacteria buildup. This convenience factor makes it an excellent choice for busy individuals who value both effectiveness and ease of care in their dental protection solutions.

The Bite Splint Design of this occlusal splint is specifically engineered to provide comprehensive protection against the forces generated by nighttime teeth grinding. By evenly distributing pressure across the dental arches, it helps to alleviate jaw muscle strain and prevent tooth damage. This thoughtful design also aids in reducing symptoms commonly associated with bruxism, such as headaches, jaw pain, and disturbed sleep, contributing to an overall improvement in quality of life.

In addition to its primary function as a nighttime guard, the nylon occlusal splint can also serve as a sport guard for athletes who require additional dental protection during physical activities. Its robust construction and secure fit offer reliable defense against impacts and injuries, making it a versatile addition to your oral care regimen.

Overall, the Occlusal Splint combines comfort, convenience, and effectiveness in one expertly crafted product. Its construction ensures durability and resilience, while the Bite Splint Design provides targeted protection tailored for nighttime teeth grinding. Whether you are seeking relief from bruxism, this night guard stands out as a superior choice. Invest in your dental health with this innovative and reliable occlusal splint, and experience the benefits of better sleep, reduced discomfort, and long-lasting tooth protection.

Features:

Product Name: Occlusal Splint

Design: Bite Splint Design for optimal fit and comfort

Material: Made from durable 3D Printed night guard material

Flexibility: High flexibility to adapt to your bite

Breathability: Breathable design for all-night comfort

Durability: Long-lasting night guard construction

Convenience: Easy to use and maintain

Advanced technology: Crafted with precision using 3D printing for a perfect fit

Technical Parameters:

Breathability	Breathable
Adjustability	Adjustable For Fit
Durability	Durable
Flexibility	High
Usage	For Nighttime Teeth Grinding
Comfortable	Yes
Design	Bite Splint Design
Easy To Clean	Yes
Effective	Yes
Convenient	Yes

Applications:

The ADL Occlusal Splint, originating from Shenzhen, China, is a highly durable and breathable dental appliance designed to provide exceptional protection and comfort. Certified with ISO, CE, and FDA approvals, this product guarantees quality and safety for users worldwide. With a bite splint design, the ADL splint ensures optimal fit and effectiveness, making it an excellent choice for those seeking a reliable occlusal guard or sports mouthguard.

One of the primary application occasions for the ADL Occlusal Splint is nighttime use as a night guard. It helps individuals who suffer from bruxism (teeth grinding) or clenching during sleep, preventing tooth damage, jaw pain, and other related issues. Thanks to its 3D printed splint technology, the guard offers a precise and customized fit, enhancing comfort and wearability throughout the night. The breathability of the material ensures that users can sleep without discomfort or excessive heat buildup.

In addition to nighttime protection, the ADL Guard is ideal for athletes and active individuals who require reliable mouth protection during physical activities. The durable 3D printed splint construction provides robust resistance against impacts, reducing the risk of dental injuries during contact sports such as football, hockey, or martial arts. Its convenient design allows athletes to wear the guard easily and clean it effortlessly after use, ensuring hygiene and long-lasting performance.

The product's packaging details include plastic bags and a box, providing secure and hygienic storage. With a minimum order quantity that is negotiable and a supply ability of 630 technicians, ADL can accommodate both individual and bulk orders efficiently. Customers benefit from a fast delivery time of 72 hours and flexible payment terms via Paypal or T/T, making the purchasing process smooth and convenient.

Overall, the ADL Occlusal Splint / Sport Guard is a versatile, easy-to-use dental appliance suitable for various scenarios—from protecting teeth during sleep with a nylon night guard to safeguarding athletes on the field with a breathable, durable 3D printed nylon splint. Its combination of advanced design, quality certifications, and customer-centric service makes it a top choice for dental protection needs.
