Product Description

Product Description

PFM (Porcelain Fused To Metal) Crown and Bridge restorations from our China dental lab combine a strong metal framework with layered porcelain to deliver natural-looking, long-lasting results. The metal substructure provides exceptional strength and fracture resistance, while the porcelain veneer reproduces the translucency and color of natural teeth.

Our Product

One of the key benefits of the PFM Crown and Bridge is its accurate precision of margins. Each unit fits precisely against the prepared tooth for a comfortable, secure fit and a clean marginal seal. The material is biocompatible with the oral environment, reducing the risk of irritation or allergic reaction for sensitive patients.

The restoration is produced with CAD/CAM assisted design and meticulous hand-layering for consistent esthetics and a reliable fit. Our lab is ISO, CE, and FDA certified, with more than 13 years of experience and 630 skilled technicians supporting dental clinics and dental labs worldwide.

Key Features

Product Name: PFM Crown And Bridge

Material: Porcelain Fused To Metal

Framework: Co Cr Alloy

Esthetics: Natural

Strength: High

Fit: Precise

Biocompatibility: Excellent

Shade: A1/A2/A3/A3.5...16 Shades

Technical Parameters

Product Name	PFM Crown And Bridge
Material	Porcelain Fused To Metal
Framework	Co Cr Alloy
Esthetics	Natural
Strength	High
Fit	Precise
Precision Of Margins	Accurate
Resistance To Wear	High
Durability	Long-lasting
Biocompatibility	Excellent
Indications	Single Unit Or Multi-unit Bridges
Application	Anterior And Posterior Restorations

Applications & Ordering Information

PFM Crown and Bridge is packaged in plastic bags and box, and the standard delivery time is 72 hours. Payment terms are flexible, with Paypal or T/T available. ADL has a supply ability of 630 technicians, ensuring timely delivery for dental clinics and dental labs worldwide.

The product is suitable for single crowns and multi-unit bridges, anterior and posterior restorations, and long-span bridge frameworks. Typical scenarios include repairing decayed or traumatized teeth, replacing missing teeth, restoring function after root canal treatment, and improving the appearance of discolored or misshapen teeth.

With its strong Co Cr framework, natural-looking porcelain, and accurate marginal fit, the PFM Crown and Bridge is a dependable and cost-effective choice for dental professionals seeking reliable, long-lasting restorations.
