Product Description

Product Overview

Precious Alloy PFM (Porcelain Fused to Metal) Crown and Bridge restorations from our China dental lab pair a noble metal framework with high esthetic porcelain to deliver natural-looking results. The precious alloy core provides excellent strength and a warm shade that avoids the gray show-through common with base metal frameworks.

Our Product

One of the key benefits of the Precious Alloy PFM Crown and Bridge is its accurate precision of margins. Each unit fits precisely against the prepared tooth for a comfortable, secure seat and a clean marginal seal. The noble metal content also improves biocompatibility against the oral environment, reducing the risk of irritation or metal sensitivity.

The restoration is produced with CAD/CAM assisted design and careful hand-layered porcelain to reproduce the translucency and color of natural teeth. Our lab is ISO, CE, and FDA certified, with more than 13 years of experience and 630 skilled technicians supporting dental clinics and dental labs worldwide.

Key Features

Product Name: Precious Alloy PFM Crown and Bridge

Material: Porcelain Fused to Metal

Framework: Precious Alloy (Noble Metal)

Esthetics: High

Strength: High

Fit: Precise

Metal Sensitivity: Low

Shade: A1 / A2 / A3 / A3.5 ... 16 Shades Available

Technical Parameters

Product Name	Precious Alloy PFM Crown and Bridge
Material	Porcelain Fused to Metal
Framework	Precious Alloy (Noble Metal)
Esthetics	High
Strength	High
Fit	Precise
Precision of Margins	Accurate
Resistance to Wear	High
Durability	Long-lasting
Biocompatibility	Excellent
Indications	Single Unit or Multi-unit Bridges
Application	Anterior and Posterior Restorations

Applications & Logistics

Precious Alloy PFM Crown and Bridge is packaged in plastic bags and boxes, with a standard delivery time of 72 hours. Payment terms are flexible, with PayPal or T/T available. ADL has a supply ability of 630 technicians, ensuring timely delivery for dental clinics and dental labs worldwide.

The product is especially suitable for visible anterior restorations, high esthetic single crowns, and multi-unit bridges where a natural appearance and a warm metal shade are desired. Typical scenarios include repairing decayed or traumatized teeth, replacing missing teeth, restoring function after root canal treatment, and improving the appearance of discolored or misshapen teeth.

With its noble metal framework, high esthetic porcelain, and precise marginal fit, the Precious Alloy PFM Crown and Bridge is a premium, biocompatible choice for dental professionals seeking natural, long-lasting restorations.
